

Press Release

June 4th, 2012

intellim Corporation (Headquarters: Osaka, President & CEO: Masakuni UKITA, "intellim") announced today that intellim established their 1st oversea office in Taipei, Republic of China (Taiwan) in May, 2012.

Mr. Ukita made the comments as follows:

"I announced proudly we had established our representative office in Taipei. Japanese Pharmaceutical/Medical device companies have been expanding their clinical developments into East Asian countries these days. intellim would like to respond to their expectations. Our decision will also contribute to accelerate their drug developments, and give them additional choices."

No other Japanese CRO has ever established their office in Republic of China.

Our representative office will support overall of the clinical operation, and gather the information related to drug developments. It will make to unify the contact, and can communicate in Japanese between the clients and CRO even if it is multinational study. Additionally, we are considering having the strategic business partnership with oversea enterprise. This plan will make us offer full package services including central laboratory services to Japanese clients.

[intellim Corporation]

intellim Corporation was founded in 2005. The service areas are Basic research, Regulatory Consulting, DM/Stats, Monitoring and Audit. Both in-and out-sourcing services can be provided. intellim announced last year that they would strengthen Oncology and global developments.
